

BioDust

Advanced Organic Soil Enhancer

Revolutionizing Soil Health with Humic and Fulvic Power

BioDust is an innovative organic soil amendment formulated with first-grade humic and fulvic acids, designed to revitalize soil fertility, enhance plant growth, and promote sustainable agriculture. This eco-friendly solution optimizes soil structure, increases microbial activity, and improves nutrient absorption, reducing the reliance on chemical fertilizers while boosting crop productivity.

Key Benefits:

- ✓ **Maximized Plant Growth & Yield** - Stimulates root development, accelerates seed germination, and enhances photosynthesis.
- ✓ **Improved Soil Fertility** - Enriches soil with essential nutrients and enhances cation exchange capacity.
- ✓ **Eco-Friendly & Cost-Effective** - Reduces the need for synthetic fertilizers and pesticides while increasing crop resilience.
- ✓ **Heavy Metal Detoxification** - Chelates and removes harmful contaminants, restoring soil health.
- ✓ **Versatile Application** - Ideal for agriculture, hydroponics, horticulture, turf management, vineyards, and post-fire soil restoration.

APPLICATION RATE

💧 Dissolve 10 gram of BioDust in 1 liter of water and apply to 4,000 square feet once per month.

Why Choose BioDust?

- 100% Organic & SENASA Certified
- Water-Soluble & Easy to Apply
- Enhances Drought Resistance & Erosion Control
- Supports Sustainable Farming Practices
